

SOUTHERN TRINITY GROUNDWATER CONSERVATION DISTRICT

We Serve McLennan County

McLennan County Aquifers

The aquifers and alluvium deposits that are included within the Southern Trinity Groundwater Conservation district include the Trinity Aquifer and the Brazos River Alluvium. The Trinity Aquifer is classified as a major aquifer, while the Brazos River Alluvium are classified as minor. Major aquifers are over much larger areas than minor aquifers and produce larger amounts of water. The Trinity Aquifer has been pumped heavily and is considered a primary groundwater management area. Thanks to the regulation of groundwater conservation districts and well owners, the lifespan of the aquifer has been extended.

✓ Legislation

Multiple laws are responsible for the formation of the Southern Trinity Groundwater District,

- Senate Bill 1985
- Senate Bill 2513
- Senate Bill 5821

STGCD By-Laws

More information on this legislation can be found on our website: www.southerntrinitygcd.org

✓ Permits

A permit is required within the Southern Trinity Groundwater district in order to drill or operate a well. Depending on the well's status and intended purpose, there are different types of permits available.

Visit our website to learn which permit is right right for you at: www.southerntrinitygcd.org

✓ Board Meetings

The public is welcome to attend any meeting of the board. The board meets on the third Wednesday of every other month at 12:30 in the McLennan County Archives 824 Washington Avenue. If there are any changes to the meeting time, it will be posted in Waco, Texas.

If you wish to be on the agenda of the board, please contact the office at (254) 759-5610 at least 7 days prior to the meeting taking place.
