

# Mission and Management Plan

Our mission is to help conserve, preserve, protect, and prevent the waste of groundwater. We also strive to control the subsidence and sinking of the land from groundwater withdrawals. All conservation districts are required to construct a management plan to regulate the use of groundwater.

- Provide the most efficient use of groundwater resources
- Minimize and control groundwater wastage
- Control and prevent subsidence
- Address surface water issues
- Address natural resource issues
- Address drought issues
- Address conservation

Monitored groundwater well
